Subject: Microsoft Anti-Trust Case

I understand you are listening to public opinion on the case against Microsoft.

That, if I may say, is your first mistake. It is not a matter of public opinion whether Microsoft is allowed to be free to sell its product to a willing buyer- in a free society. Any such transaction has nothing to do with parties outside of that transaction. How dare you be so presumptuous!

Microsoft has added incredible value to all our lives, business and public and must be left free to continue its product development and promotion in any way it see fit.

Land of the Free? Only if you realise the evil that this case is trying to perpetrate.

Simon Bates
Waterloo, London.
